

Master™ Shellac, Solvents, Pigments and Aluminum Powder

Pattern Shop/Foundry Supplies

Master™ Orange Pattern Shellac

Made for the Pattern Industry

MASTER Orange Pattern Shellac is the highest grade of shellac obtainable and is especially formulated for the pattern industry. The light orange flakes are free and clean and produce a high gloss coating.

MASTER Orange Pattern Shellac is sold as dry flakes in any quantity by the pound – 164 pound bags are available. Three to four pounds of shellac flakes are usually mixed with one gallon of MASTER Solvent to make a suitable pattern coating. You may adjust this ratio to suit your liking.

Description	Size	Catalog Number
Dry Flakes	Pound	912-1SF
3-pound Cut	1 Gallon	912-1S3G
4-pound Cut	1 Gallon	912-1S4G

Master™ Kindt Vermilion

(No Longer Available)

A quality, popularly priced domestic vermilion powder that does an excellent job of coloring shellac, lacquers, etc. It produces a light color, and when properly mixed, the pigment does not settle.

Size	Catalog Number
1 Pound	N/A

Master™ Aluminum Powder

(No Longer Available)

An extremely fine ground aluminum powder used as an additive to shellac, lacquer, etc. The metal particles will improve wearing and parting qualities of the shellac or lacquer.

MASTER Aluminum Powder, used in its dry form, acts as an effective release agent.

Master™ Solvent for Shellac

A Thinner for Shellac

A special solvent for dissolving shellac flakes or thinning shellac. It is fast-acting and quick-drying.

Size	Catalog Number
1 Gallon	921-MS01G
5 Gallons	921-MS05G
55 Gallons	921-MS55G
